

MONOTONICITY OF VALUES FOR COOPERATIVE GAMES

Christine Renee Martell

Holly M. Winn

July 1989

It is important to recognize the power behind this paper. Without a grant by the National Science Foundation this program would not have been available. Equally important, without our organizer, coordinator and advisor David Housman, our insight would not have been as insightful. We would like to take this opportunity to thank David and give him our appreciation for his dedication and motivation.
